EDUCATION

RAJALAKSHMI ENGINEERING COLLEGE
B.E., Computer Science
2018-2022 | Chennai
CGPA: 8.96 / 10

SKILLS

LANGUAGES:

Go | Swift | Objective-C | C | Rust
C++ | Python | JavaScript | Java | SQL | Dart

TECHNOLOGIES:

Linux | macOS | Windows
WebRTC | IPC | System Services
Native desktop UI | Diagnostics | Technical POCs | Feasibility analysis | Unit & integration testing

CERTIFICATIONS

ALGOEXPERT
Completed SystemsExpert and InfraExpert courses and quizzes.

KAGGLE PYTHON | OCT 2021
Certified by Kaggle in Python.

HACKERRANK | JUL 2020
Certified in Problem Solving (Basic).

NVIDIA DLI | MAR 2020
Completed DeepStream Video Analytics on Jetson Nano.

NVIDIA DLI | DEC 2019
Completed Deep Learning Fundamentals for Computer Vision.

ACHIEVEMENTS

IIC | MAY 2021
Among 127 national pre-finalists for startup incubation.

MICROSOFT AZURE HACK-3 | NOV 2020
Ranked 3rd among 2,500+ teams.

MICROSOFT AZURE HACK-1 | SEP 2020
Ranked 1st among ~4,000 teams.

EXPERIENCE

ZOHO CORPORATION | NATIVE DESKTOP / SYSTEMS DEVELOPER
Jun 2022 - Present | Chennai, India
ManageEngine Remote Access Plus & Zoho Assist

- Developed system/user services and native remote-control applications, and researched compatibility with modern Linux desktop environments.
- Built cross-platform diagnostic utilities for service, task and file management and native UI applications.
- Developed remote-control recording components and worked on core session operations, service management and performance optimization.
- Integrated interprocess communication and shared components supporting desktop applications across platforms.
- Implemented unit and integration tests for diagnostic tools and remote-control applications on Windows, Linux and macOS.

RAISEIN VENTURES PRIVATE LIMITED | ML INTERN
Jun - Aug 2020 | Chennai, India

- Implemented face detection with Haar cascades and skin-tone detection with k-nearest neighbors.
- Deployed a production-ready Flask container on AWS Beanstalk and developed a Firebase Cloud Firestore backend with Python SDK and Flutter integration.

BENNETT UNIVERSITY | STUDENT INTERN
Dec 2019 | Greater Noida, India

- Explored Deep Extreme Cut, Faster R-CNN, online object tracking and segmentation methods.
- Developed and deployed online tracking with deep video inpainting on NVIDIA supercomputing infrastructure.

PROJECTS

CONTACTLESS COVID TESTER | MAY 2020

- Implemented personalized diet suggestions with a Random Forest model.
- Developed a convolutional neural network to predict the likelihood of a dry cough and integrated the AI models into a Flask web app for doctors.

AI-IoT WASTE SEGREGATION | SEP 2020

- Integrated an AI model with Azure IoT services to segregate paper, plastic and metal waste.
- Used REST APIs to access Azure Cosmos DB.

COLLEGARE | NOV 2020

- Developed a Flutter app connecting pharmaceutical companies, hospitals, medical stores, patients and doctors.
- Designed a Firebase Cloud Firestore backend for the application.
